

Station Airport: Take off with your events, come

A spectacular feature of Station Airport, the new special event venue in Düsseldorf International Airport's long-distance train station, is the fantastic view of the runways through the all-round panorama windows. The adjoining outer terrace, from where the planes seem to be within your grasp, is a special highlight. Station Airport is able to accommodate 1,650 persons on two different levels that can also be used independently. There's no limit to your creativity: a surface of approx. 3,900 square metres provides sufficient space for events in pole position.

in successfully.
